Advantage:

The winding machine is controlled by a multi-functional single-chip microcomputer, and the data settings are easy to save for a long time;

The winding machine automatically arranges the wire, and automatically stops when the set number of turns is reached.

It has the function of parking at both ends, and the position of the wire axis can be adjusted by the teaching function;

It can assist the setting of winding point and width position, and can also input digital setting.

The wiring effect is good, the startup speed is fast, and the number of turns is accurate.

PRACTICAL APPLICATION :

TRAINNING CUSTOMER TO OPERATE WINDING MACHNE :

- 1.All service engineers with 10 years experience are gotten special technology training, who can deal with various breakdown problm.
- 2.Guide the user to use accurately and how to maintain the produt. Provide free consultation about production process technology of electronic products.
3. In order to guarantee the machine used normally, we'd have trai ing on how to operate, use and maintain our product by English m anual, video, guiding on line.
