GW-8001T Core inner and outer circular wrapping belt suction machine

To improve the product's pressure resistance, the magnetic ring is coated with rubber on both the inner and outer circumferences as required. This is a non-standard, customized product and must be made according to the customer's specifications.

1. Specialized for Inner and Outer Circular Core Wrapping

Designed specifically for magnetic cores requiring both inner and outer circular tape wrapping, ensuring stable, uniform, and tightly bonded insulation layers.

2. High-Precision Wrapping Performance

Equipped with an advanced control system that maintains consistent tape tension and overlay accuracy, effectively preventing wrinkles, gaps, or uneven tape distribution.

3. Efficient Suction-Assisted Tape Positioning

The built-in suction mechanism supports accurate tape guidance and fixation during the wrapping process, improving smoothness and reducing tape shifting or misalignment.

4. Semi-Automatic Operation for High Productivity

Combines automatic wrapping with manual setup, greatly enhancing production efficiency while reducing operator workload and skill requirements.

5. Adjustable Parameters for Multiple Core Specifications

Supports flexible adjustments of tape width, tension, speed, and wrapping direction, making it compatible with various core sizes and shapes.

6. Stable and Durable Mechanical Structure

Constructed with high-quality components and precision transmission parts, ensuring low vibration, smooth operation, and long-term reliability.

7. User-Friendly Operation Interface

Features an intuitive control panel with real-time status display, enabling quick parameter setting, operation monitoring, and fault diagnosis.

8. Enhanced Safety Protection

Equipped with emergency stop, overload protection, and safety shielding to ensure safe operation during continuous production.

9. Wide Application in Transformer and Magnetic Industry

Ideal for wrapping toroidal cores, circular inductors, and similar magnetic components that require high-quality insulation tape application.

PRACTICAL APPLICATION :

TRAINING CUSTOMER TO OPERATE WINDING MACHINE :

- 1.All service engineers with 10 years experience are gotten special technology training, who can deal with various breakdown problem.
- 2.Guide the user to use accurately and how to maintain the Digital CNC Wire Coil Winding Machine.

Provide free consultation about production process technology of electronic products.

- 3.In order to guarantee the machine used normally, we'd have training on how to operate, use and maintain our product by English manual, video, guiding on line.

PACKAGING:

Packaging Material: Carton/Wooden case with foam inside.

1.General package(Paper carton or plastic bag): For small equipped parts for Digital CNC Wire Coil Winding

Machine, Package it with form and pack paper to guarantee unbroken during the transport.

2.Wooden case package: For larger scale Digital CNC Wire Coil Winding Machine, we have special skilled

carpenter, who would make the proper wooden case with exact thickness, density, length. The up arrow ↑ marked on the outer wooden case. Buffer material would be put in the wooden case to prevent crack and shock.
