GWZ-T50-01 Semi-Automatic Medium-Sized Winding Machine

Non-standard models

For nickel-gold cores, is coating required during the winding process? Dry coating and wet coating are available.

Equipment Introduction 1

1. Each machine comes with one set of winding cores (custom size specified by the customer).

2. Winding specifications: Inner diameter 8-30mm, outer diameter <40mm, width 5-15mm;

Nanocrystalline thickness:

18-35 μ m.

3. Manual/semi-automatic winding;

winding speed adjusted according to the strip material, speed approximately 0-1500 rpm.

4. Set the number of winding turns as required (count turns to 999).

5. Automatically detect the outer diameter of the product (outer diameter error less than ± 0.1 mm).

6. Welding after winding using a welding machine.

GREWIN INDUSTRIAL GROUP CO.,LTD.

Add: The fourth floor A-A3 zone aviation business area,Dongli Distr,Tianjin,China.

Equipment Introduction 2

1. Each machine comes with one set of winding cores (custom size specified by the customer).
2. Winding specifications: Minimum inner diameter 30mm, maximum outer diameter 200mm, nanocrystalline tape width: 10mm-50mm, nanocrystalline thickness: 14-30 μ m.
3. Winding speed: Adjustable from 0-1000 rpm.
4. Automatic detection of product outer diameter (outer diameter error less than ± 0.1 mm).
5. Stepper motor control of the winding shaft; winding speed and number of turns can be set.
6. Human-machine interface; simple, intuitive, and convenient operation.
7. Automatic alarm and centralized display for any abnormalities or material shortages.
8. Continuous tape feeding; tension control structure ensures product tightness and size consistency; tension is adjustable.
